Senior Database Programmer/Analyst

JOB OVERVIEW:

Maintains, designs, and develops data-related processes and database assets to deliver solutions for the business. Participates in both large project work, as well as support ticket routine daily tasks. Works with the Development Team to learn the necessary data structures and systems that are in place. Participates in architectural design sessions, and shares experience on best practices to produce the best possible solutions.

REQUIRED QUALIFICATIONS AND SKILLS:

- Minimum 10 years of experience required in a data-related IT role;
- Experience with Oracle and/or SQL Server;
- Proficient in SQL language for writing database queries or ad hoc reports, etc.;
- Data integration experience between software systems;
- Flexibility and willingness to work on a variety of tasks/projects to support the business in a small team environment.

DESIRED QUALIFICATIONS AND SKILLS:

- Experience using an ETL tool such as SSIS or Informatica;
- Salesforce integration experience;
- Microstrategy BI experience or similar;
- Software development experience;
- Experience building data warehouse components or working knowledge of data warehouse design concepts.

WORKING CONDITIONS:

- Regularly required to, stand, sit, talk, hear, and use hands and fingers to operate a computer and telephone keyboard;
- Specific vision abilities required by this job include close vision requirements due to computer work;
- Ability to uphold the stress of working under deadlines;
- Will have atypical work weeks depending on project deadlines;
- After hours availability is required in this position.

NOTE: Job duties and/or qualifications are subject to change at any time.
